

MineScape 2021 Update 3

RELEASE NOTES

January 2022

RELEASE INFORMATION

ABOUT THIS RELEASE

The MineScape Team have put together a fantastic new release for the start of 2022. Update today and see all the new enhancements and improvements that have gone into this release.

WHAT'S IMPROVED

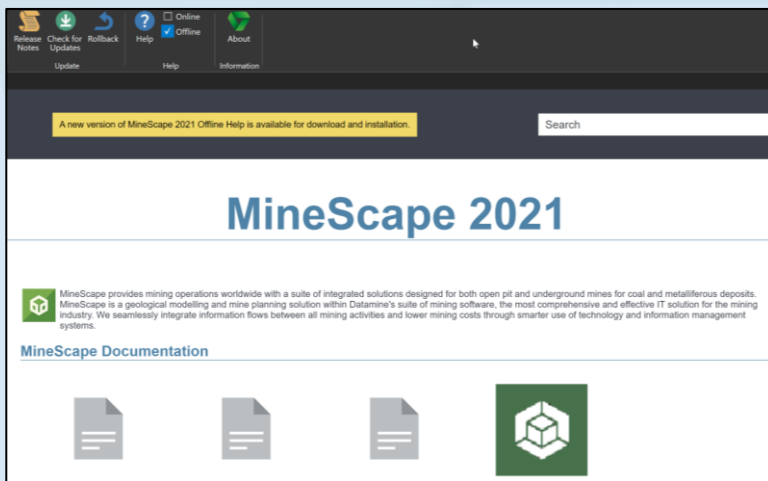

Figure 1: Notifications for new versions of Offline Help are now displayed at the top of your help pages. This is a friendly reminder for customers using Offline Help that a new up-to-date version is available.

You can update the Offline Help by downloading the MineScape Help Installer from the Software Distribution Portal.

Have an idea for a new MineScape app or feature?-- drop us a line, and let's discuss it. We are always available to hear new ideas and requests.... in fact, we love it!

Hot Features

- MineScape 2021 now supports Microsoft Windows 11
- Added support for Unaccumulated Reserves on Multi-Mesh Reserve Samples
- Mining Solids now includes "Export to Tempo" option
- Added a new 'Walk-Route Grade Check' option to assign stationing and generating slope percentage along a defined line
- Added support for outputting MineScape data to LandXML format
- Blockmodel now supports exporting reserves and polygons to XPAC
- You can now change the layer name when exporting to AutoCAD
- You can now add two additional metadata fields (AutoCAD name and layer) when importing AutoCAD files to MineScape
- You can now open reports in Excel or Spreadsheet Editor directly
- Warnings for an expiring license are now colour coded and displayed on the Start Page and also the bottom right corner of MineScape
- GDB and Stratmodel Apps have newly designed forms
- MineScape Offline Help now displays "new versions are available" at the top of the Help page
